Summary

Newly graduated professional with software development project experience. Focused, results-driven and knowledgeable in multiple computer languages. Seeking an opportunity to enhance various software packages.

Projects

MealPlan App Project *Aug-Oct 2023*

- In this project I have created an app which will give us the meal plan of the whole day using calorie intake of a person.
- Integrated the Spoonacular API to streamline data retrieval and enhance user experience, resulting in a 40 percent reduction in manual data entry and increased efficiency for the development team.

Face Recognition using BIO Heat Transfer (Final Yr Project) *2022-2023*

- In this project Infrared Camera is used to extract unique features of a person using Pennes equation of bio heat and DCT .
- This recognition method can detect faces even if you have a scar on the face and invariant to the surrounding temperature and Heat.
